FAQ :

Q: How do I replace the battery?

A: Use a coin to twist and open the back cover. Replace the old battery with a new one. Make sure the positive side of the battery is facing upwards.

Q: How do I know if my Itag is connected?

A: The App will show the connection status of your Itag. If it is connected, the App will show the location of your Itag on the map.

Q: What should I do if I lost my phone?

A: Press the button on the Itag, it will sound an alarm on your phone even if it is on silent mode.

Q: Can I use multiple Itags with one App?

A: Yes, you can use up to 8 Itags with one App.

If you have any further questions or concerns, please contact our customer service team.

Tips for Optimal Use:

- Use multiple Itags to keep track of different objects.
- Use the remote shutter function to take group photos without a selfie stick or to take photos from a distance.
- Use the GPS Locator function to track the location of your pets or children.

TROUBLESHOOTING:

Possible problems:

1. The Bluetooth connection doesn't work.
Solution: Make sure your device is compatible with the product and that the Bluetooth is turned on. Reset both the device and the product and try connecting again.
2. The product doesn't track the item it's attached to.
Solution: Make sure the product is securely attached to the item. Check the distance between the device and the item, and make sure it's within the device's range. Try resetting the product and connecting it again.
3. The alarm doesn't sound when the item is lost.
Solution: Make sure the alarm is turned on and that the volume is set high enough. Test the alarm in a quiet environment to make sure it works properly.
4. The battery doesn't last long enough.
Solution: Make sure the product is fully charged before use. Reduce the frequency of use or adjust the settings to save the battery life.

Thank you for choosing Zaicus Itag Bluetooth Tracer Anti Lost Alarm Remote Wireless Key Finder! We hope this troubleshooting guide was helpful for you.
