TROUBLESHOOTING:

Problem 1: The trimmer doesn't turn on.

Solution: Check to make sure the trimmer is properly charged. If it is, try resetting the trimmer by holding down the power button for 10 seconds.

Problem 2: The trimmer is not cutting evenly.

Solution: Make sure the blades are clean and properly lubricated. Also, consider using a comb attachment to help guide the trimmer for a more even cut.

Problem 3: The trimmer is pulling hair instead of cutting it.

Solution: Try adjusting the trimmer's length settings and using a shorter length setting. Also, make sure the blades are clean and properly lubricated.

Problem 4: The trimmer makes a loud noise when being used.

Solution: Make sure the blades are properly placed in the trimmer and are not loose or damaged. Also, try lubricating the blades to reduce friction.

Problem 5: The trimmer's battery life is shorter than expected.

Solution: Check for any excessive battery drain, such as leaving the trimmer plugged in for too long. Also, make sure the trimmer is fully charged before each use and consider replacing the battery if necessary.
